Full course description	<p>Video: https://www.youtube.com/watch?v=6SRzTjPW0yY</p> <p>The notion and practice of Sharia in the West is entirely new and in continuous development. In this course we will discuss the interaction between what Muslims in the West want and do in terms of Sharia, and how Western legal, political, societal and cultural systems respond to these manifestations of Sharia. We will explore how this interaction creates the dynamic that result in a new synthesis of 'Sharia in the West.' In order to explore this new domain, we will develop methods of law, anthropology, and other disciplines to approach this domain. Active participation of the students is key to this course: they are invited to provide examples of sharia in their own Western countries, and to analyse them by means of discussion and essays.</p> <p>The students will gain insight in how European policy makers as well as the Muslim communities have been struggling to accommodate an 'Islamic' presence in a mostly secular European environment. The students will acquire the skills to read and discuss the relevant court rulings, policy documents in a critical fashion, contextualize these readings in a larger academic theoretical framework, and to present the results of their independent research in terms of policy briefs or oral advice to government officials or Muslim communities.</p>
